	The rate of annual growth of the addressable market. (There are other methods of growing your business, such as market share growth and acquisition growth, but for purposes of analyzing the market, we should stick with the "organic" growth of the industry itself rather than different ways we can grow compared to our competitors.)			
<b> </b>	Why This Matters			
	The higher your organic growth, the better the opportunity. The faster the market grows, the easier it will be for you to grow your business as a rising tide lifts all boats.
